

FCC Rural Health Care Pilot Program WC Docket No. 02-60

Quarterly Report January – March 2009

Submitted by the

Michigan Public Health Institute (MPHI)

Jeffrey Taylor, Project Coordinator (PC)
Jeff Shaw, Assistant Project Coordinator (APC)

On April 30, 2009

1. Project Contact and Coordination Information

a. Identify the project leader(s) and respective business affiliations.

The Project Coordinator (PC) is Jeffrey Taylor, Executive Director, Michigan Public Health Institute (MPHI). The Assistant Project Coordinator (APC) is Jeff Shaw, Senior Project Manager, MPHI.

b. Provide a complete address for postal delivery and the telephone, fax, and e-mail address for the responsible administrative official.

The APC's (Jeff Shaw's) contact information follows:

Michigan Public Health Institute 2436 Woodlake Circle, Suite 300 Okemos, MI 48864

Telephone: 517.324.6055

Fax: 517.324.6086

E-mail: jshaw@mphi.org

c. Identify the organization that is legally and financially responsible for the conduct of activities supported by the award.

The Michigan Public Health Institute (MPHI) is legally and financially responsible for the conduct of activities supported by the award.

d. Explain how project is being coordinated throughout the state or region.

The project is being managed by MPHI.

Initial recruitment of HCPs to participate in the project was approached on a regional basis using representatives residing in each of five rural Medical Trading Areas (MTAs) covering 80 percent of the state (excluding only the southeastern quadrant of Michigan's Lower Peninsula). These regional representatives were employed by health care facilities and knew or were familiar with the HCPs located within their respective MTAs. Once the bulk of the LOAs had been received, MPHI assumed the task of obtaining missing information and resolving paperwork problems.

Initially, the MTA representatives handled most of the communication with the participating HCPs. Coordination with the regional reps was managed by telephone, email, and teleconferences. However, as the LOA collection process progressed, MPHI assumed more responsibility for communicating directly with the HCPs. As part of this effort, MPHI launched a website dedicated to the Michigan RHCPP: http://fcc.mphi.org.

Representatives of each MTA, the Michigan Department of Information Technology (MDIT), and the Michigan Department of Community Health (MDCH) formed an RFP Review Team. The team met on a weekly basis, via teleconference, to develop and refine

the RFP. Now that the RFP has been developed, this team will likely form the core of the Evaluation Committee that will review the responses to the RFP.

During the USAC site eligibility review process (early October 2008 through present), MPHI coordinated the flow of data between USAC and the sites that applied for federal funding. MPHI submitted data to USAC in three batches: for the entire set of 551 sites in early October; for a third of the sites in mid-January; and, finally, for 37 sites in mid-February. USAC finalized the eligibility status of most sites (with a half dozen exceptions) on February 25, 2009. The remaining sites are still outstanding.

MPHI keeps the participating HCPs informed about the progress of the project. Examples of such activities follow.

- MPHI conducted a conference call with the regional representatives on April 14 and with the HCPs on April 17. Each regional representative and each participating HCP received a letter and an e-mail that summarized the project's history and invited them to attend the conference call.
- In late April, by letter, MPHI formally notified the participating health care providers (HCPs) of the results of the eligibility review. If any site was deemed ineligible for federal funding, the specific FCC rationale was provided.
- MPHI posts updates on the aforementioned Michigan RHCPP website. The latest update was dated April 22.

The Governor of Michigan, MDIT, MDCH, and Michigan's Congressional delegation, all of whom are keenly interested in a successful implementation of the project, are being briefed on a regular basis. MDIT and MDCH officials are conferring with the APC and his project team on a bi-weekly basis.

- 2. Identify all health care facilities included in the network.
 - a. Provide address (including county), zip code, Rural Urban Commuting Area (RUCA) code (including primary and secondary), six-digit census tract, and phone number for each health care facility participating in the network.

A total of 133 HCPs owning 553 sites have submitted LOAs, although nine sites have been withdrawn from the project for various reasons. A list of the 553 sites (with withdrawn sites marked by strikethrough) is attached to this report.

- b. For each participating institution, indicate whether it is:
 - i. Public or non-public;
 - ii. Not-for-profit or for-profit;
 - iii. An eligible health care provider or ineligible health-care provider with an explanation of why the health care facility is eligible under section 254 of the 1996 Act and the Commission's rules or a description of the type of ineligible health care provider entity.

See the aforementioned list. Sites 43 and 457 are data centers and are shown as "Pilot Ineligible," although they will be included at the 466-level. Sites 155 and 239 are "administrative." USAC has placed a hold on eligibility decisions for these types of sites, but they are shown as "Pilot Eligible" on the spreadsheet. USAC deemed sites 169 and 187 to be ineligible. MPHI disagrees with the ruling for site 187 and plans to appeal. Site 169 disagrees with the ruling and has asked MPHI to appeal. Both sites are shown as "Pilot Eligible" on the spreadsheet.

- 3. Network Narrative: In the first quarterly report following the completion of the competitive bidding process and the selection of vendors, the selected participant must submit an updated technical description of the communications network that it intends to implement, which takes into account the results its network design studies and negotiations with its vendors. This technical description should provide, where applicable:
 - a. Brief description of the backbone network of the dedicated health care network, e.g., MPLS network, carrier-provided VPN, a SONET ring;
 - b. Explanation of how health care provider sites will connect to (or access) the network, including the access technologies/services and transmission speeds;
 - c. Explanation of how and where the network will connect to a national backbone such as NLR or Internet2;
 - d. Number of miles of fiber construction, and whether the fiber is buried or aerial;
 - e. Special systems or services for network management or maintenance (if applicable) and where such systems reside or are based.

Statewide RFP. MPHI submitted its RFP to USAC for an informal review in late October 2008. MPHI plans to post its RFP for 75 days. Vendor selection and contract negotiations are expected to take an additional one to two months. MPHI is still waiting for eligibility rulings for two administrative sites. MPHI plans to build a "MPLS-like" network liking health care providers in Michigan. This network's backbone will link into Internet2 in at least two locations.

Thumb Rural health Network (TRHN) Mini-RFPs. Due to the delays the main RFP has encountered, a small subset of HCPs is moving ahead with a separate RFP. This bid process will consist of 2 small RFPs. The Thumb Rural Health Network is a consortium of eight (8) "Pilot Eligible" hospitals that is expanding an existing wireless network with five additional microwave towers—four at individual hospitals and one centrally located Hub tower—(first small RFP) and related telecommunications equipment located at each hospital site (second small RFP). The TRHN regional network will become part of the statewide network once the latter is constructed. The TRHN network will connect to the Internet and the national backbone at two sites. MPHI plans to submit both small RFPs early in the next quarter.

- 4. List of Connected Health Care Providers: Provide information below for all eligible and ineligible health care provider sites that, as of the close of the most recent reporting period, are connected to the network and operational.
 - a. Health care provider site;
 - b. Eligible provider (Yes/No);
 - c. Type of network connection (e.g., fiber, copper, wireless);
 - d. How connection is provided (e.g., carrier-provided service; self-constructed; leased facility);
 - e. Service and/or speed of connection (e.g., DS1, DS3, DSL, OC3, Metro Ethernet (10Mbps);
 - f. Gateway to NLR, Internet2, or the Public Internet (Yes/No);
 - g. Site Equipment (e.g., router, switch, SONET ADM, WDM), including manufacturer name and model number.
 - h. Provide a logical diagram or map of the network.

Not applicable, as no RFPs have been posted. No HCPs will be connected to the Michigan network until sometime in the second half of 2009.

- 5. Identify the following non-recurring and recurring costs, where applicable shown both as budgeted and actually incurred for the applicable quarter and funding year to-date.
 - a. Network Design
 - b. Network Equipment, including engineering and installation
 - c. Infrastructure Deployment/Outside Plant
 - i. Engineering
 - ii. Construction
 - d. Internet2, NLR, or Public Internet Connection
 - e. Leased Facilities or Tariffed Services
 - f. Network Management, Maintenance, and Operation Costs (not captured elsewhere)
 - g. Other Non-Recurring and Recurring Costs

Not applicable, as no RFPs have been posted.

- 6. Describe how costs have been apportioned and the sources of the funds to pay them:
 - a. Explain how costs are identified, allocated among, and apportioned to both eligible and ineligible network participants.
 - b. Describe the source of funds from:
 - i. Eligible Pilot Program network participants
 - ii. Ineligible Pilot Program network participants
 - c. Show contributions from all other sources (e.g., local, state, and federal sources, and other grants).

¹ Non-recurring costs are flat charges incurred only once when acquiring a particular service or facility. Recurring costs are costs that recur, typically on a monthly basis, because they vary with respect to usage or length of service contract.

- i. Identify source of financial support and anticipated revenues that is paying for costs not covered by the fund and by Pilot Program participants.
- ii. Identify the respective amounts and remaining time for such assistance.
- d. Explain how the selected participant's minimum 15 percent contribution is helping to achieve both the selected participant's identified goals and objectives and the overarching goals of the Pilot Program.

Not applicable

7. Identify any technical or non-technical requirements or procedures necessary for ineligible entities to connect to the participant's network.

Not applicable

- 8. Provide an update on the project management plan, detailing:
 - a. The project's current leadership and management structure and any changes to the management structure since the last data report; and

There has been no change from prior Quarterly Reports. For current project leadership, please refer to the response to question 1.

b. In the first quarterly report, the selected applicant should provide a detailed project plan and schedule. The schedule must provide a list of key project deliverables or tasks, and their anticipated completion dates. Among the deliverables, participants must indicate the dates when each health care provider site is expected to be connected to the network and operational. Subsequent quarterly reports should identify which project deliverables, scheduled for the previous quarter, were met, and which were not met. In the event a project deliverable is not achieved, or the work and deliverables deviate from the work plan, the selected participant must provide an explanation.

MPHI's plan is one of the more ambitious among the 69 selected by the FCC for RHCPP support. MPHI plans to network up to 550 HCP sites stretched across 80 percent of the state's geography. Participants will be classified into four categories: Tier 1 (large regional referral hospitals), Tier 2 (other hospitals), Tier 3 (large clinics with five or more clinicians), and Tier 4 (smaller clinics). All HCPs will be connected to the Internet2 backbone. Connection throughput; the number of virtual private network connections; the locus of equipment management; the uptime, response time, and repair time requirements; and other features will vary by Tier, with the most robust service being provided to Tier 1 HCPs. Since an RFP has not been posted, vendor responses have not been evaluated, and a contract has not been negotiated and awarded, it is not possible to provide expected connection/operational dates for the likely HCP participants.

A tentative project schedule follows:

- July-September 2008. The RFP was written; refined; and reviewed by a prominent telecommunications law firm. *COMPLETED*
- October 2008 The RFP was finalized. *COMPLETED*
- November 2008 USAC reviewed the RFP. *COMPLETED*
- October 2008 through the present USAC reviews the eligibility of sites for FCC funding. Decisions on two sites are still outstanding more than six months after the initial submission of data. See the response to Question 2 for identification of the sites.
- *Month x* (due to the delay caused by USAC's review of site eligibility, unable to make a projection) The RFP is posted on the USAC website. MPHI responds to questions from the proposing vendors. Proposals are received.
- Approximately *Month x* plus 90 days MPHI selects a contractor and negotiates a contract.
- Approximately *Month x* plus 150 days (up to two years in duration) The contractor builds the network, with HCPs connected in a serial manner as quickly as possible.
- 1st year of network operation (timing will vary by HCP) The monthly service costs during the first year of each HCP's participation in the network are subsidized by RHCPP funds (85%) and, possibly, third-party funds (up to 15%), with the balance being paid by the HCP.
- 2nd through 5th years of network operation The monthly service rates paid by the HCPs were set by the original contract. The HCPs pay 100 percent of those costs.
- 9. Provide detail on whether the network is or will become self sustaining. Selected participants should provide an explanation of how network is self sustaining.

The network is expected to become self-sustaining due to several factors. Since the RFP has not been released nor bids received, detailed cost information is not available. Before addressing the factors that will result in the network becoming self-sustaining, it is necessary to provide some background on Michigan's planned use of RHCPP funds. From the beginning, Michigan's plan has been to use the RHCPP grant to fund just the one-time (install) costs and the first year's ongoing (operating) costs. After that first year, sites will be responsible for funding the ongoing costs.

First, the economies of scale of negotiating a 500-site consortium will drive down the ongoing costs. Second, the sites will know what the ongoing cost will be before committing to participate and will agree to cover that cost after the first year of operation (i.e., after the RHCPP funding in no longer available). They can anticipate the cost and budget accordingly. MPHI intends to negotiate a contract that requires the vendor to stipulate service costs (by specific site) up front and maintain that cost structure for a minimum of five years. It is expected that this cost will be less than what the HCPs are currently paying for Internet service or, if the RHCPP network costs are higher, that the network's additional benefits will outweigh the additional cost. (The state-wide health care network will be tailored to meet the *unique* requirements of the health care industry.) Third, the most heavily weighted proposal evaluation criterion will be the ongoing (post-

RHCPP project support) cost to the participating HCPs. MPHI plans to use RHCPP funds to pay for the expensive capital investment up front and make the ongoing cost very affordable for the sites. Last, to help offset the ongoing cost, after the first year of operation, eligible rural HCPs will be migrated from the RHCPP into the traditional USF Rural Health Care Program. To facilitate this, MPHI will be requesting that USAC grant "evergreen" status to the contract that results from Michigan's RHCPP project.

Michigan's RHCPP is structured so that participating HCPs have to demonstrate a financial and operational commitment to the statewide network *at the onset of their participation*. They must commit funds to connect to the network and, in so doing, commit to use the network for their vital health care communications needs. After these initial commitments are made, the financial economies and the operational utility of the RHCPP-funded network will compel the HCPs to continue using it. The initial required commitments and the subsequent market-driven usage are the essence of sustainability.

- 10. Provide detail on how the supported network has advanced telemedicine benefits:
 - a. Explain how the supported network has achieved the goals and objectives outlined in selected participant's Pilot Program application;
 - b. Explain how the supported network has brought the benefits of innovative telehealth and, in particular, telemedicine services to those areas of the country where the need for those benefits is most acute;
 - c. Explain how the supported network has allowed patients access to critically needed medical specialists in a variety of practices without leaving their homes or communities;
 - d. Explain how the supported network has allowed health care providers access to government research institutions, and/or academic, public, and private health care institutions that are repositories of medical expertise and information;
 - e. Explain how the supported network has allowed health care professional to monitor critically ill patients at multiple locations around the clock, provide access to advanced applications in continuing education and research, and/or enhanced the health care community's ability to provide a rapid and coordinated response in the event of a national crisis.

Not applicable

- 11. Provide detail on how the supported network has complied with HHS health IT initiatives:
 - a. Explain how the supported network has used health IT systems and products that meet interoperability standards recognized by the HHS Secretary;
 - b. Explain how the supported network has used health IT products certified by the Certification Commission for Healthcare Information Technology;

- c. Explain how the supported network has supported the Nationwide Health Information Network (NHIN) architecture by coordinating activities with organizations performing NHIN trial implementations;
- d. Explain how the supported network has used resources available at HHS' Agency for Healthcare Research and Quality (AHRQ) National Resource Center for Health Information Technology;
- e. Explain how the selected participant has educated themselves concerning the Pandemic and All Hazards Preparedness Act and coordinated with the HHS Assistant Secretary for Public Response as a resource for telehealth inventory and for the implementation of other preparedness and response initiatives; and
- f. Explain how the supported network has used resources available through HHS' Centers for Disease Control and Prevention (CDC) Public Health Information Network (PHIN) to facilitate interoperability with public health and emergency organizations.

Not applicable. However MPHI, the State of Michigan, and the participating HCPs are well aware of the HHS health IT initiatives and intend to incorporate them, as appropriate.

12. Explain how the selected participants coordinated in the use of their health care networks with the Department of Health and Human Services (HHS) and, in particular, with its Centers for Disease Control and Prevention (CDC) in instances of national, regional, or local public health emergencies (e.g., pandemics, bioterrorism). In such instances, where feasible, explain how selected participants provided access to their supported networks to HHS, including CDC, and other public health officials.

Not applicable.

Completed by: Jeff Shaw, RHCPP Assistant Project Coordinator and MPHI Senior Project Manager, and Harry Levins, MPHI Project Manager, 04/30/09
